

One healthcare company. Two ways to access it.

Healthcare is moving toward **modern, on-demand care** — consumers paying more for their own health and expecting access on their terms, and providers pushed to modernize how they deliver it.

InPursuit's delivery model is built to capture **both**.

InPursuit furnishes and coordinates care through two channels — one direct to consumers, one for providers — both running on a single orchestration layer.

DIRECT-TO-CONSUMER CHANNEL

Harness the Power of Your Data™

- 1 Consumer enrolls **directly** — through the app, no referral needed
- 2 One **unified health record** they own and carry for life
- 3 A **proactive AI health guide** — care gaps, savings, and next steps surfaced automatically
- 4 **On-demand clinical care** — concierge access that scales with their membership tier

THE MEMBER OWNS THE DATA · INPURSUIT NEVER SELLS IT

PROVIDER CHANNEL

Results Matter™

- 1 Practice refers & enrolls eligible patients
- 2 InPursuit **furnishes care** — RPM · CCM · Telehealth
- 3 InPursuit **bills payers directly under its own NPI**
- 4 Practice keeps billing its own visits — workflow unchanged

COMPLETE, CONTINUOUS CARE · STRONGER OUTCOMES · DEEPER PATIENT TRUST

BOTH RESOLVE TO A SINGLE, PERSON-CENTRIC RECORD

INPURSUIT INFRASTRUCTURE · ORCHESTRATION LAYER

Enterprise-grade

The orchestration layer both channels run on.

InPursuit bills payers under its own NPI for services it furnishes. Referring practices continue billing their own visits. No revenue share, no per-referral fee, no percentage of value-based care revenue.
