

THE ADMINISTRATION'S HEALTH TECH AGENDA

Where the Administration is taking healthcare, *InPursuit Health delivers.*

THE INITIATIVE LAUNCHED AT THE WHITE HOUSE • JULY 2025

In July 2025, the White House and CMS launched the Health Tech Ecosystem initiative, calling on the private sector to make health data work for patients: interoperable, secure, and personal. Companies pledged; CMS tracked delivery.

One year later, InPursuit is among the companies recognized for shipping. Not a commitment, not a criteria phase: General Availability, independently reviewed, and operating today.

THREE FEDERAL PRIORITIES • ONE INFRASTRUCTURE

01 Patients own their record

The Administration's clipboard-free vision is the InPursuit starting point: every provider, lab, and payer assembled into one record the person owns, protected by the InPursuit Data Oath and shared only when they choose.

02 AI that works for one person

The InPursuit Orchestration Layer runs any AI, not only our own, routing each person to the best model for their condition and returning recommendations written for one person, citing their own numbers.

03 Chronic care that reaches patients

InPursuit Reflect captures FDA cleared vitals in a fifty-second scan, and the same infrastructure lets independent practices furnish and bill the monitoring and chronic care they could never staff.

THE QUALITY CREDENTIAL CMS SELECTED

The DiMe Seal was awarded to the InPursuit Health App in July 2026, valid through July 2027. It is the independent review credential CMS selected for entry into the Medicare App Library, and it sits alongside the security posture the record runs on.

CARIN ALIGNED

FEDERAL RECOGNITION • JULY 27, 2026

Recognized by CMS, *in every category we pledged.*

At America's Health Data Freedom Day, the one-year anniversary of the CMS Health Tech Ecosystem, InPursuit Health, LLC was presented a Certificate of Recognition for achieving General Availability, signed by the Administrator of CMS. InPursuit earned recognition across all three of its pledged categories, was featured in the CMS showcase alongside Apple, Oura, and MEDITECH, and is listed in the CMS Pledge Demo Showcase on CMS.gov, with five of the eight newly announced pledge categories already live in the InPursuit Health App.

**PLEDGE 01 • GENERAL AVAILABILITY****Conversational AI**

Personalized guidance in plain language, powered by the InPursuit Orchestration Layer.

PLEDGE 02 • GENERAL AVAILABILITY**Kill the Clipboard**

Every provider, lab, and payer assembled into one record the person owns and shares.

PLEDGE 03 • GENERAL AVAILABILITY**Chronic Care**

Daily vitals and condition support that feed billable monitoring for provider members.

Dr. Mehmet Oz

Administrator, Centers for Medicare & Medicaid Services

Amy Gleason

Deputy Administrator & Chief Product Officer at CMS, Administrator of USDS

FROM PLEDGE TO RECOGNITION

One year, *delivered.*

JUL 2025

The pledge

The CMS Health Tech Ecosystem launches at the White House. InPursuit pledges in three categories: Conversational AI, Kill the Clipboard, and Chronic Care.

2025 • 2026

The build

The InPursuit Orchestration Layer and the InPursuit Health App reach operating status: one record, real-time insurance, telehealth, InPursuit Reflect, medications, care plan, and savings.

JUL 14, 2026

DiMe Seal awarded

The InPursuit Health App earns the independent review credential CMS selected for the Medicare App Library. Valid through July 2027.

JUL 27, 2026

Certificate of Recognition

General Availability recognized in all three pledged categories, signed by the Administrator of CMS. Featured in the CMS showcase alongside Apple, Oura, and MEDITECH, with a dedicated listing in the CMS Pledge Demo Showcase on CMS.gov.

NEXT

Medicare App Library

Targeting the new Medicare App Library and its 67M recipients, with five of the eight newly announced pledge categories already live in the app.

THE EIGHT NEW PLEDGE CATEGORIES • ANNOUNCED JULY 27
