

Delivering person-centric *wellness and healthcare*.

InPursuit Health is a digital healthcare and wellness company. We deliver personalized wellness and healthcare directly to consumers, and equip independent providers with digital care services they have never been able to offer their patients, all running on the InPursuit Orchestration Layer, our infrastructure that is already built and operating today.

One foundation. Two ways to deliver modern, personalized care.

BUILT AND OPERATING, NOT A ROADMAP

- **CMS General Availability**
Recognized in all three pledged categories. Targeting the new Medicare App Library, 67M recipients.
- **Anchor practice signed**
Honeycomb Medical Group, 22,000 patients, first deployment.
- **Rural Health grant submitted**
Filed in Mississippi with our anchor practice.
- **J. Krug distribution**
Employer-benefits brokerage, ~300 clients, confirmed channel.

THE GAP NOBODY HAS CLOSED

THE CONSUMER SIDE

330M

People who cannot assemble or use their own complete health record

\$1,092/yr

already spent per person on digital health and wellness apps, 3 to 7 apps on a phone, none talking to each other.
MCKINSEY FUTURE OF WELLNESS 2025

THE PROVIDER SIDE

230K

Independent practices that cannot deliver the digital care patients now expect

500M+

patient portal downloads, and 76% are opened once and never again. The tools patients were given do not work.
JMIR / MHEALTH RETENTION RESEARCH

Two sides of the same broken system, waiting for the same thing.
InPursuit is the healthcare infrastructure that closes both.

One infrastructure, built once, *serving both*.

The record and the AI are the foundation, an orchestration layer that runs **any AI, not only our own**, routing each person to the best model for their condition. Everything else is delivery. As each practice joins the InPursuit Partner Network, thousands of consumers gain access to the same infrastructure through the free InPursuit app, creating a self-reinforcing ecosystem that benefits both. **The second capability costs a fraction of the first, and the fifteenth costs less.**

For the 330M
people

Person-Centric Care

Owned by you. Protected by InPursuit. Shared only when you choose.

For the 230K
practices

FOR THE PERSON • YOUR DATA WORKING FOR YOU

Harness the Power of Your Data™

Save time and save money, with healthcare and wellness personalized to you.

- 1 **ASSEMBLE** Every provider, lab, and payer into one record you own.
- 2 **UNDERSTAND** What works for you, not for people like you.
- 3 **BENEFIT** Savings, coverage, and cashback when you engage.

FOR THE PRACTICE • NEW CAPABILITIES

Results Matter™

You finally have the ability to deliver digital services, within a modern infrastructure.

- 1 **IDENTIFY** Who qualifies for which service across the panel.
- 2 **FURNISH** The monitoring and chronic care you could never staff.
- 3 **BILL** Documented to the code standard, furnished and billed.

What are you *InPursuit* of?

AS A PERSON

Better numbers. More years. Fewer surprises. More time back. Still being there for the people who need you.

AS A PRACTICE

Finally offering the care your patients are asking for. Growing without hiring. Competing with the big systems. Staying independent while you do it.

The answer is different for every single person, and every single practice.
That difference is the entire point, and it is the reason we exist.

One app. Many capabilities. *This is one of them.*

The InPursuit app is where a person's whole health life lives: their record, insurance, virtual visits, medications, care plan, and savings, all in one place. The screens on this page show a single capability inside it, **InPursuit Reflect**. We lead with it because it serves both engines at once: D2C members open it daily to track their vitals and health, and those same scans generate the ongoing monitoring data our provider members deliver as reimbursable care.

YOU ARE VIEWING JUST ONE ▾

01 • ASSEMBLE

Your whole picture

Every record you have, plus every vital you capture, resolved into **one score and one story**.

02 • MEASURE

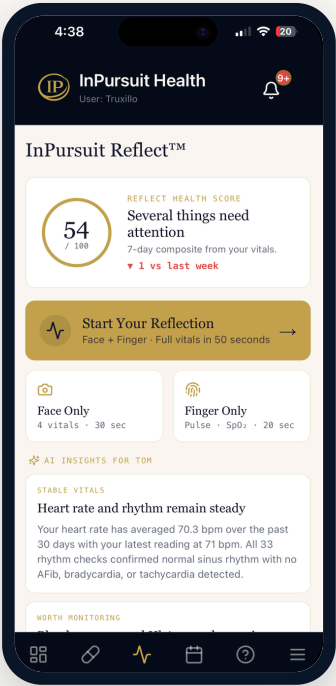

Fifty seconds

Point the phone at your face, then hold a finger to the camera. **No cuff, no lab, no wearable.**

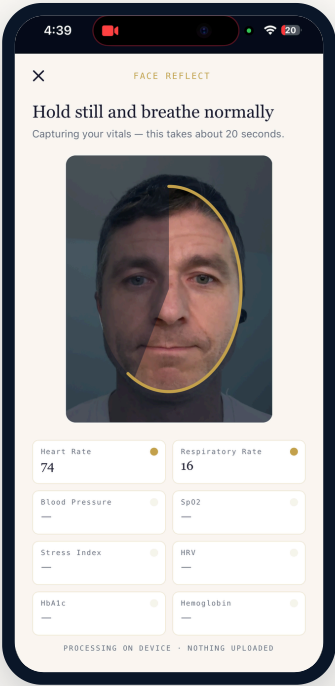

03 • ACT

What to do about it

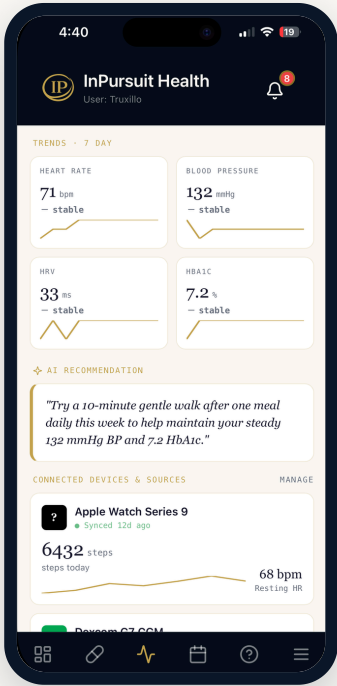

Trends, every connected device, and **an AI recommendation written for one person**.

ON SCREEN
The InPursuit Reflect Health Score, week-over-week trend, and an AI read written in plain language.

ON SCREEN
InPursuit Reflect mid-scan. Vitals populate live, on device. Nothing uploaded.

ON SCREEN
Seven-day trends, an AI recommendation citing this person's own numbers, and every device feeding the record.

InPursuit Reflect

THE BRIDGE, IN ONE GESTURE

50 sec

21

7

0

Face and finger scan, start to finish.

Vitals and wellness signals from a single scan.

FDA cleared determinations among them.

Cuffs, labs, wearables, or clinic visits required.

InPursuit Reflect is the biometric hub. Beyond its own face and finger scan, it ingests data from any connected wearable or device the member already owns, then writes it all back to the one record that powers the insights, the care plan, and the provider's billable monitoring. One hub, every signal, both engines fed from the same place.

VETTED • TRUSTED • SECURE

The standing to deliver, *and the posture to protect.*

THE INPURSUIT DATA OATH

inpursuithealth.com/data-oath

Your data is yours. Period. We never sell it, never broker it, and never use it to train an outside model. We protect it, organize it, and put it to work, for you.
